EDUCATION

Pontifical Catholic University of Paraná, Curitiba, PR

Technologist in System Analysis and Development | August 2023

SKILLS

Programming: Java, Spring Framework, Javascript, React Framework, Vue.js framework, Kotlin, PostgreSQL, SQL and NoSQL, Python, Django Framework, Docker

Cloud: AWS S3 and RDS, GCP BigQuery and Firebase, Azure Blob Storage

AI & GenAI: Prompt Engineering, OpenAI API, Claude (Anthropic), LLM Integration, Google Stitch

CI/CD & DevOps: GitHub Actions, Vela CI, Docker

Other Skills: Scrum, Agile, Solution Architecture, Swagger/OpenAPI, JUnit, Mockito

Languages: Portuguese – Native | English – Fluent | Spanish – Basic

PROFESSIONAL EXPERIENCE

Go On Associated, Sr Software Engineer | April 2026 – Present – Curitiba, PR

- API development with Java and Spring Boot, actively participating in solution architecture and technical evolution of systems
- Lead delivery pipeline improvements using GitHub Actions and Vela CI, ensuring reliable and automated releases
- Maintain comprehensive API documentation with Swagger/OpenAPI for all production services
- Implement security practices across all application layers — from design to deploy
- Active personal practice in prompt engineering using Claude and AI-assisted development tools, and UI/UX prototyping with Google Stitch
- Mentor junior and mid-level developers through a structured mentorship program, guiding code quality, architecture decisions, and career development
- Main customer: Cargill

Go On Associated, Sr Back-end Developer | April 2025 – April 2026 – Curitiba, PR

- Contributed to Smart Reader, an AI-powered document intelligence solution for Cargill: integrated OpenAI LLM APIs and Tesseract OCR to extract and interpret data from PDFs and images, enabling a conversational chat interface for users to query document content in natural language
- Development of a web portal using Strapi as the backend and creating custom endpoints within Strapi
- Development of new functionalities for an API using Java Spring Framework
- Designed software solutions with detailed cloud infrastructure architecture
- Main customer: Cargill

Go On Associated, Back-end Developer | April 2024 – April 2025 – Curitiba, PR

- Development of REST APIs using Java Spring Boot for an E-Commerce platform integrating enterprise ERP systems (SAP) and CloudCraze to fetch prices in near real time, read product data and send orders to SAP
- Development of a single-purpose API to sync data from a centralized database to an offline mobile application, and process incoming orders back to SAP
- Wrote unit and integration tests using JUnit and Mockito, maintaining high code quality across all delivered services
- Main customer: Cargill

Go On Associated, *Jr Back-end Developer* | April 2023 – April 2024 – Curitiba, PR

- Development of new features using Java Spring Boot for REST APIs and migrating an old database to a central database to improve the overall application maintainability and performance
- Main customer: Cargill

Go On Associated, *Jr Developer* | April 2022 – April 2023 – Curitiba, PR

- Development of new features using Java, Vue.JS, NodeJS, ElectronJS and Firebase, understanding the problems that the clients were facing and working on a solution with the team
- Conducted Daily meetings in the absence of the Scrum Master
- Developing a system to facilitate the incorporation of new clients
- Main customer: WiseDigital

Go On Associated, *Intern* | April 2021 – April 2022 – Curitiba, PR

- Database maintenance with MySQL, developing system improvements using PHP and prototyping new pages using Figma
- Creation of a webpage that displays data from a Firebase query using JavaScript, HTML and CSS and direct customer support
- Main customer: Go On and WiseDigital
